

Oracle® Communications Data Model

Release Notes

11g Release 2 (11.2)

E15888-08

April 2011

This document outlines new features for Release 11.2.4 of Oracle Communications Data Model. It also contains important information that was not included in the documentation for Release 11.2.4 of Oracle Communications Data Model.

This document may be updated after it is released. To check for updates to this document and to view other Oracle documentation, refer to the Documentation section on the Oracle Technology Network (OTN) Web site:

<http://www.oracle.com/technology/documentation/index.html>

This document contains the following topics:

- [Section 1, "New Features"](#)
- [Section 2, "Known Issues"](#)
- [Section 3, "Fixed Bugs"](#)
- [Section 4, "Documentation Changes"](#)
- [Section 5, "Related Documentation"](#)
- [Section 6, "Documentation Accessibility"](#)

1 New Features

This release of Oracle Communications Data Model contains the following new features and functionality:

- Extensions to the logical and physical data model. For example, more stages on Network events (CDR) like Raw, Mediated, Billed to support detailed revenue assurance analysis; and Prospect lifecycle (including proposal, acceptance, and rejection). See *Oracle Communications Data Model Reference* for details.
- Certified for use with Oracle Business Intelligence Suite Enterprise Edition 11g. See *Oracle Communications Data Model Installation Guide* for details.
- Enhancements to improve the look and feel of all of the sample reports included in Oracle Communications Data Model.

2 Known Issues

This release has the following known issues:

- [The Description of the Database Connection Settings is Incomplete](#)

- [Re-installation of Oracle Communications Data Model with Sample Reports Fails](#)

2.1 The Description of the Database Connection Settings is Incomplete

In the Oracle Communications Data Model Installation Guide, a step in the "Installing Oracle Business Intelligence Suite Enterprise Edition Catalog for Oracle Communications Data Model" topic is omitted that would ensure a complete description of the database settings.

This issue is documented in Bug 12310652.

Workaround

Once Oracle Business Intelligence Suite Enterprise Edition is installed, please add the following entry into `BIEEHOME/Oracle_BI1/network/admin/tnsnames.ora`

```
ocdm_db =
(DESCRIPTION =
(AADDRESS = (PROTOCOL = TCP)(HOST = hostname.domain)(PORT = port-number))
(CONNECT_DATA =
(SERVER = DEDICATED)
(SERVICE_NAME = SID) # Change your SID, Hostname, and Listener PortNumber
)
)
```

Tip: Be careful to split these commands properly when you add them to the file. Do not add them as one long concatenated line of code.

Note: If you want to use another database name, you must change the `tnsname` in the Oracle Business Intelligence Suite Enterprise Edition repository. See the Oracle Business Intelligence Suite Enterprise Edition documentation for directions for defining a database connection in repository.

2.2 Re-installation of Oracle Communications Data Model with Sample Reports Fails

The de-installation script for Oracle Communications Data Model does not delete the `OCDM_SAMPLE_SYS` schema. Consequently, a re-installation of the Oracle Communications Data Model with sample reports fails.

This issue is documented in Bug 11934887.

Workaround:

If you want to re-install Oracle Communications Data Model with the sample reports, take the following steps before you begin re-installation:

1. Login database using the DBA account.
2. execute the following SQL statement.

```
drop user ocdm_sample_sys cascade;
```

3 Fixed Bugs

The following bugs were fixed:

9890888
9956846
10015499
10143431
10167956
10190366
10220763
10277377
10277627
10285028
10330783
10357400

4 Documentation Changes

In this release of *Oracle Communications Data Model Reference*, Chapter 2 contains updated lists of Business Area logical entities, but does not contain figures showing the logical data model organization. You need to obtain the IP Patch (p11930575_1124_generic.zip) to view the complete logical data model documentation. The IP patch includes the Business Area figures and an up-to-date description of the Logical Data Model. The documentation provided in the IP Patch is intended for customers who have purchased Oracle Communications Data Model and need additional details and descriptions for the Logical Data Model. To obtain the IP Patch and for the latest information about Oracle Communications Data Model patch sets, go to My Oracle Support at <https://support.oracle.com>.

5 Related Documentation

This release of Oracle Communications Data Model includes the following documentation:

- *Oracle Communications Data Model Installation Guide* that describes how to install and configure the Oracle Communications Data Model.
- *Oracle Communications Data Model Reference* that describes the data model structures for Oracle Communications Data Model.
- *Oracle Communications Data Model Operations Guide* that describes the tasks and procedures that must be performed after Oracle Communications Data Model is installed, and periodically afterwards to maintain useful performance. Since the needs of each Oracle Communications Data Model environment are unique, Oracle Communications Data Model is configurable so it can be modified to address each customer's needs.

6 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at

<http://www.oracle.com/us/corporate/accessibility/index.html>.

Access to Oracle Support

Oracle customers have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/support/contact.html> or visit <http://www.oracle.com/accessibility/support.html> if you are hearing impaired.
